-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a method of correcting corrupted magnetic ink character recognition (MICR) indicia data, classified in class 382, subclass 139.
 - II. Claims 12-27, and 32-34 drawn to a method of processing a check transaction, classified in class 705, subclass 45.
 - III. Claims 28-31, drawn to a method of selecting alternate MICR data, classified in class 382, subclass 139.
2. The inventions are distinct, each from the other because of the following reasons:
 - Inventions I and II are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I relates to a method of correcting corrupted magnetic ink character recognition (MICR) indicia data, whereas invention II relates to a method of processing a check transaction. Hence invention I has a different utility and scope than invention II. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II. Restriction for examination purposes as indicated is proper.
 - Inventions II and III are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each

other if they are shown to be separately usable. In the instant case, invention II relates to a method of processing a check transaction, whereas invention III relates to a method of selecting alternate MICR data. Hence invention II has a different utility and scope than invention III. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III. Restriction for examination purposes as indicated is proper.
